There are many other excellent resources also.

I hope these notes will be of particular interest to those deeply concerned about the environment, and also wishing to explore what the Bible has to say on this subject with a view to taking really practical steps towards action. The amount of material is large, and one study can be spread over two sessions if required, or not all questions need to be discussed.

I am very grateful to Rev.Dave Bookless (A Rocha), and Dr. Peter Carruthers (JRI) for their helpful comments and suggestions.
